Notes

1. In order to maintain reversibility middle dot (·) is added:
 - a. if a consonant character is followed by an independent vowel character;
 - b. if a consonant character without an inherent vowel is followed by another independent consonant character (not part of a ligature).
2. Although the UN romanization recommends to romanize always the inherent *a*, except word-finally (e.g. कानपुर Kānapur), in KNAB the actual pronunciation should be reflected, e.g. Kān·pur. If a name ends with a *virāma*, the UN romanization recommends to use a sub-macron at the end of the word (e.g. जगत् Jagat̄), in KNAB it should be Jagat".
3. In the UN romanization ñ → m̄, middle dot and " are omitted.
